Seated Exercises

Physical Therapy Home Program

Name ___________________________ Date ________________

Therapist _________________________ Phone number ________________

Instructions

• Sit up straight in a firm chair with back supported and feet flat on the floor.

• To make exercises harder, slowly increase the number of repetitions.

• Work hard, but stay within your level of comfort.

• Exercises should not cause sharp pain. If you have pain, ease up on the movement. If you still have pain, stop.

• Do not hold your breath as you exercise. Breathe out as you move and breathe in when you’re in the resting (starting) position.

☒ Sitting kicks (long arc quads)

Straighten the knee of one leg as much as you can. Hold your leg up for _____ seconds. Do this _____ times. Repeat with other leg.

How often to exercise

Do these exercises: ____________________

Special instructions
