Seated Exercises

Rehabilitation Home Program

Name ___________________________ Date ___________________

Therapist ___________________________ Phone number ________________

Instructions

• Sit up straight in a firm chair with back supported and feet flat on the floor.

• To make exercises harder, slowly increase the number of repetitions.

• Work hard, but stay within your level of comfort.

• Exercises should not cause sharp pain. If you have pain, ease up on the movement. If you still have pain, stop.

• Do not hold your breath as you exercise. Breathe out as you move and breathe in when you’re in the resting (starting) position.

☐ Sitting kicks (long arc quads)

Straighten the knee of one leg as much as you can. Hold your leg up for _____ seconds. Do this _____ times. Repeat with other leg.

How often to exercise

Do these exercises: ____________________

_________________________________________________________________

_________________________________________________________________
☐ Knee raises (hip flexion)
Lift and lower one knee, then the other. Do this _____ times on each leg.

☐ Legs apart (hip abduction)
Move your legs wide apart and then together again. Do this _____ times. You may do one leg at a time, or both legs together.

☐ Toe raises
Gently rise up on your toes and rock back on your heels. Do this _____ times.

☐ Chair push-up
Lift your buttocks off the seat of the chair by pushing down and straightening your arms. Do this _____ times.
