Removing Air from an Enteral Feeding Bag

1. Add formula to the bag
2. Lay the bag on a flat surface. Hold the cap at a 90 degree angle to the bag.
3. Press on the bag slowly until the formula reaches the cap.
4. Tighten the cap. You may still see a few air pockets. These should not affect your feedings.
5. Attach the tubing to the pump as instructed.
6. Turn the pump on. Prime the tubing on the pump using the prime button. Do this until the formula reaches the end of the tubing.
7. Start feeding as instructed.
